

TRINIDAD AND TOBAGO GAZETTE

(EXTRAORDINARY)

VOL. 46

Port-of-Spain, Trinidad, Tuesday 7th August, 2007—Price \$1.00

No. 131

1439

APPOINTMENT TO ACT AS MINISTER OF WORKS AND TRANSPORT

IT IS HEREBY NOTIFIED for general information that His Excellency the President, acting in accordance with the advice of the Prime Minister, in exercise of the power vested in him by subsection (2) of section 79 of the Constitution of the Republic of Trinidad and Tobago, has appointed DR. KEITH ROWLEY, a Member of the House of Representatives, to act in the Office of the Honourable COLM IMBERT, Minister of Works and Transport, with effect from 4th August, 2007 and continuing during the absence from Trinidad and Tobago of the said the Honourable Colm Imbert, M. P., in addition to the discharge of his normal duties.

H. HEMNATH
*Secretary to His Excellency
the President*

2nd August, 2007.

1440

MAMMOGRAPHY TRAINING/EDUCATION

1. Trains in breast anatomy and physiology, positioning and compression, quality assurance/ quality control techniques, imaging of patients with breast implants;
2. Performs a minimum of twenty five (25) examinations under the direct supervision of a qualified radiographer.
3. Understands basic principles (indications, benefits, risks) to enable appropriate responses to questions from patients and family.
4. Understands definitions and basic descriptions of treatment options.

Quality Assurance and instrumentation

- Understands the design characteristics of :
 - Low imaging equipment
 - Structure of Mammography tube (anode, filtration, window etc)
 - Use of compression devices
 - Applications of automatic exposure control
 - Effects of grids, system geometry (SID, OID, magnification etc.) and density settings
- Applies imaging and recording components:
 - Analog and digital for image recording
 - Film
 - Screens and cassettes
 - Processor
 - Digital Components
 - image receptor
 - monitor
 - laser printer
 - packs systems
- Practices strict quality assurance comprising:
 - Radiographers' tests on the exposure factors
 - Purpose (Beam alignment)
 - Frequency(Control of storage)
 - Equipment and procedure(darkroom control cleanliness,processor sensitivity to light)
 - Measures test performance criteria(keeping records of
 - Initiates corrective action
 - Initiates biomedical engineers
 - Medical physicist for radiations leaks (measures test performances)

Medico-Legal Aspect

- Supports Accreditation and Certification:
 - Agency (Society of Radiographers or professional body)
 - Engages in upholding the professional standards record keeping
 - Establishes evidence based practice and assists in research
 - Appropriate Image ID and labeling
 - Maintenance of film and reports
 - Personnel requirements for radiographers
 - Communication of results to patient.

5. Practices mammographic technique and image evaluation on:

- Technical factors
- Breast compression
- Magnification Techniques
- Evaluation of image Quality
- Biopsies

Patient Care

- Puts patient at ease and takes detailed history

6. Positioning and Interventional Procedures

- Selects equipment appropriate to the patient and the examination to be performed e.g (platforms, grids, compression plates, cassettes).
- Selects and records exposure factors based upon breast tissue density, patient's age, numerical compression scale and equipment characteristics.
- Places radiopaque markers on film receptors to document breast imaged and projection used.
- Positions patient and equipment to provide projections specified by international protocol requisition form.
- Evaluates the images to assure that they contain proper identification and are of diagnostic quality.
- Assists in needle localization
- Applies knowledge of breast MRI
- Applies knowledge of breast ultrasound , biopsy or fine needle aspiration
- Performs stereotatic procedures
- Knowledge of breast implants
- Performs ductography
- Performs diagnostic work up (magnification etc.) and other special projections

7. Radiographic Critique/Interpretation

- Evaluates radiographic technique, breast anatomy and pathology and participates in reflective practice.

COMPUTERISED TOMOGRAPHY

Skills and competencies

- Evaluation of patients' requisition and /or medical record
- Identification of urgent requests based on clinical data
- Preparation of examination room
- Identification of patient
- Assessment and education of the patient concerning the procedure
- Documentation of patient history including allergies and other pertinent medical history
- Optimum patient positioning for all scans
- Optimal selection of scan protocols aligned to the clinical question
- Executes image manipulation functions, display, filming and archiving
- Documentation of procedure, treatment and patient data in appropriate record
- Discharges patients with appropriate post procedure instructions
- Applies universal precautions in all patient interactions
- Applies principles of radiation protection to ensure adherence to the ALARA principle.
- Preparation and/administration of oral, rectal and IV contrast media.
- Recognition of medical emergencies during C.T. scan and seek urgent medical help
- Evaluates results of images for image quality e.g (motion artifact, noise, optimal demonstration of anatomy. delayed imaging, reconstruction interval, algorithm, slice thickness), exam completeness.
- Current certification in CPR

Physics and Instrumentation

1. Understands CT principles operation and components
2. Understands image processing and display
3. Understands image quality
4. Recognizes and reduces artifacts
5. Performs quality assurance

Clinical Experience requirements

- Head, Neck, Spine and musculoskeletal,
- Chest, Abdomen, Pelvis, Special procedures.
- C.T. angiography
- C.T. biopsies

MAGNETIC RESONANCE IMAGING

Magnetic Resonance is the use of electromagnetism (static magnetic fields and radio frequencies) to produce diagnostic images. Radiographers registered in MRI play a significant role in imaging the brain, spine, abdomen, pelvis and the musculoskeletal and cardiovascular systems.

Skills and competencies

- Evaluates requisition and/or medical records
- Identifies patient
- Documents patient history including allergies.
- Educates patient on the procedure
- Looks after patient care and makes assessment
- Prepares examination room.
- Selects optimal imaging coil
- Positions patient
- Selects protocol
- Selects parameters
- Displays image, films and does the archiving
- Documents patient data in appropriate records
- Looks after patient discharge with post procedure instructions.
- Looks after universal precautions.
- Ensures MRI safety procedures and precautions.
- Evaluates image quality
- Ensures optimal demonstration of anatomic region
- Ensures the proper identification of patients on images.
- Ensures patient's examination completeness

Clinical Experience Requirements

Imaging Procedures:

- Head and neck
- Spine
- Thorax
- Abdomen and pelvis
- Musculoskeletal
- Special Imaging Procedures
- Quality Control

Educational Requirements**Patient Care**

- Legal and Ethical Principles
- MRI screening and Safety
- Patient assessment, monitoring and management
- Interpersonal communications
- Infection Control

Data Acquisition and Processing

- Pulse sequences
- Data Manipulation
- Special Procedures
- Sequences parameters and Options (Image quality and Contrast)

Physical Principles of Image Formation

- Instrumentation (Electromagnetism, Radiofrequency system, Gradient system)
- Fundamentals (Nuclear magnetism, Tissue characteristics, Spatial localization)
- Artifacts (Cause and appearance of artifacts, compensation for artifacts)
- Quality Control (Slice thickness, spatial resolution, contrast resolution, signal to noise, center frequency, transmit gain, geometric accuracy, equipment inspection.)

SONOGRAPHY

Description

A Diagnostic Ultrasound Professional is qualified by professional credentialing and academic and clinical experience to provide diagnostic patient care services using ultrasound and related diagnostic procedures. The Sonographer is responsible for daily operations of the sonographic laboratory, patient schedule, equipment failures, and quality assessment (QA). The sonographer maintains a high standard of medical ethics at all times and is self-motivated to increase level of understanding and knowledge of the field, disease, and new procedures as they evolve.

EDUCATIONAL REQUIREMENTS

Patient Care

- Understands Legal and Ethical Principles
- Understands Patient monitoring and Safety
- Understands Interpersonal Communications
- Understands Infection Control

Physical Principles

- Understands Generation of Signal (Transducers, Beam configuration, Pulse Characteristics, technical factors, Modes)

Propagation of Ultrasound through Tissue

- Understands Beam interactions.
- Understands Attenuation of Signal
- Understands Biological Effects

Image Production

- Understands Technical factors for Diagnostic Quality Images
 - Understands Detection and display of echoes
 - Understands Display Modes
 - Understands Appearance of artifacts
-
- Understands how to evaluate and select representative images
 - Understands how to improve suboptimal images.
 - Understands the recording modes.

CLINICAL EXPERIENCE REQUIREMENTS**(Cross sectional anatomy scanning)**

- Abdomen and pelvis (Vasculature, biliary system, urinary tract, spleen, Pancreas, liver, other organs)
- Gynecologic Structures (uterus, ovaries, adnexa)
- Obstetrics (First trimester, second and third trimesters, high risk and Complicated pregnancy)
- Other sonographic exams (superficial structures, noncardiac chest (Pleural space) and musculoskeletal

SONOGRAPHIC SKILLS

- Effectively operates sonographic equipment
- Performs clinical assessment and diagnostic sonography examinations.
- Uses cognitive skills to identify, record and adapt procedures as appropriated to anatomical pathological diagnostic information and images.
- Uses independent judgement during the sonographic examination to accurately differentiate between normal and pathological findings.
- Analyses sonograms, synthesizes sonographic informations and medical history and communicates findings to the appropriate physician.
- Assumes responsibility for the safety, mental and physical comfort of the patient while in the department.
- Maintains a daily log of patients seen.
- Prepares preliminary report and contacts physician when required.
- Organizes daily work schedule and performs related clerical duties.
- Establishes and maintains good working relationships with all healthcare personnel.

DUTIES

- Performs sonographic examinations as requested.
- Prepares preliminary reports and contacts referring physicians when required.
- Co-ordinates with other staff to assure appropriate patient care is provided.
- Organises daily work schedule and performs related clerical duties.
- Assumes responsibility for the safety and well being of all patients in the sonographic area.
- Reports equipment failures to the relevant authorities.
- Trains students.

RADIATION THERAPY

Radiation Therapists are health care professionals who employ ionizing radiation, radiopharmaceuticals, and electromagnetism (static magnetic fields and radio frequencies) and are skilled in the art and science of medical radiation treatment delivery. The majority of patients receiving radiation therapy have cancer. Along with surgery and chemotherapy, radiation therapy offers these patients the best chance to succeed in the fight against their disease.

Educational Requirements

- **Radiation protection** – This includes: Radiation Science and Maximum Permissible Dose, monitoring of radiation workers with TDL and other staff, patients and visitors.
- **Quality assurance**- Setting up policies, preceedures and processes for the safety and accuracy of equipment.
- **Clinical concepts in radiation oncology**- Anatomy, physiology and pathology,
- **Treatment planning and Simulation** with manual or computerized systems for accuracy in treatments.
- **Treatment delivery**-Accuracy in complex positioning with care regarding the anatomy and vulnerable areas.
- **Patient care and education**- Making the patient aware of the dangers of Radiation, some possible effects and ways to counteract these. Also seeing to the physical, emotional and psychological health of the patients while on treatment.
- **Dosimetry calculations** –Making sure the required dose is given to the area being treated.
- **Fabrication of beam modification devices** - Using lead shielding blocks, wedges etc.
- **High risk procedures**
- **Immobilising Techniques** – Head clamps and specially molded heard rests etc.

DUTIES

- Developing an optimal treatment distribution for each patient
- Calculating treatment doses and duration of administration
- Ensuring the use of record and verification systems
- Identifying the treatment fields and treatment volumes
- Selecting and/or verifying treatment parameters
- Administering treatment
- Determining if the image verifies treatment parameters.
- Making the patient comfortable and at ease.
- Reassuring the patients on treatment.

COMPETENCIES

- Has detailed knowledge of the normal structure and functioning of the body. (Anatomy and Physiology)
- Has detailed knowledge of diseases and the changes that occur (Pathology)
- Applies cutting edge technology of the theory and practice of all types of treatment. This is a constantly expanding and changing field.
- Adapts the varied applications of these treatments to benefit the patients.
- Adapts interpersonal skills to suit the personalities and difficulties of each patient.
- Recognises danger signals. The radiation therapist is responsible for reporting them to the Oncologist. The radiation therapist also has the responsibility of adapting or stopping treatment until the patient is seen by the Oncologist.
- Understands the principles and design and function of the various types of highly specialized radiotherapy equipment.
- Lectures and demonstrates recognized methods of patient treatment and imparts professional skills to Radiation Therapy students.
- Understands, interprets and applies the Oncologist's written prescriptions regarding radiotherapy treatments.
- Uses appropriate measures to limit the hazards associated with the use of ionizing radiation modalities
- Applies Radiation Protection methods as they relate to patients, staff and visitors.
- Uses patient information systems accurately, the use and interpretation of patient charts, records and x-rays.
- Administers and manages sector or department under direct control and establishes and maintains good working relationships with other members of the hospital team.
- Practices basic nursing skills and other specialized skills pertaining to the care of cancer patients.

NUCLEAR MEDICINE

The Nuclear Medicine Technologist is a health care professional who is able to undertake the whole range of nuclear medicine procedures. He/she is part of a team of health care specialists which may include doctors, physicists, radiochemists, radiopharmacists, nurses and others who support and care for the patient during diagnostic and therapeutic procedures.

Educational Requirements

- Understands physics and instrumentation of nuclear medicine
- Understands the clinical application of radionuclide imaging
- Understands radiation protection and quality control.
- Understands anatomy, physiology and pathology as applied to nuclear medicine.
- Understands radiopharmacy including labeling and quality control of radiopharmaceuticals
- Understands computer technology and image analysis
- Understands methods of research
- Understands how to manage a quality service
- Do case studies.

DUTIES AND RESPONSIBILITIES

Patient Care

- Provides proper comfort and care of patient prior to, during and after a Procedure, including, but not limited to, the monitoring of intravenous lines, oxygen supplies, drains and patients who are under sedation.
- Establishes and maintains proper communication with patients. (e.g. Proper introduction, appropriate explanation of the procedure, etc.)
- Behaves in a professional manner in consideration of patients' rights and Resulting in the provision of the highest quality patient care possible.
- Provides a safe and sanitary working environment for patients and the General public, using proper infection control practices in compliance With accepted precaution policies.
- Recognises and responds to an emergency situation at a level Commensurate with one's training and competency.
- Verifies patient identification, pregnancy status, breast feeding status and Written orders for the procedure.
- Ensures that informed consent has been obtained, in the method Prescribed by the institution.
- Confirms that the indication for the procedure is appropriate and consults

With the referring physician whenever necessary in order to ensure that the proper procedure is performed.

- Obtains a pertinent patient history.
- Ensures that any pre-procedural preparation has been completed, including, but not limited to, fasting, hydration, the taking of thyroid blocking compounds, voiding, bowel cleansing, and suspension of interfering medications.
- Explains the procedure to the patient which includes length of study and radiation safety issues.
- Collects samples for laboratory procedures.

Administrative Procedures

- Maintains an appropriate inventory of medical/surgical supplies, Radiopharmaceuticals, storage media and other items required to perform procedures in a timely manner.
- Schedules patient procedure appropriate to the indication and in the proper Sequence.
- Maintains appropriate records of administered radioactivity, quality control procedures, patient reports and other required records.
- Develops and revises when necessary, policies and procedures in accordance with applicable regulations.

Quality Control – Nuclear Instrumentation

- Ensures proper performance of the imaging systems, storage media, and Radiation detection and counting devices, including scintillation cameras, dose calibrators, NaI(Tl) scintillation probes and well counters, and data processing and image production devices

Diagnostic Procedures

- Prepares, evaluates and properly administers the appropriate Radiopharmaceuticals.
- Establishes and/or properly maintains venous access routes of various Configurations.
- Selects the appropriate imaging or data collection parameters.
- Administers radiopharmaceuticals through various routes including oral, intravesical, Inhalant, intravenous, intramuscular, subcutaneous and intradermal.
- Positions the patient for imaging, adapts the protocol to patient limitations and obtains images.
- Positions and verifies the placement of electrocardiographic leads.
- Reviews images to ensure that required information has been collected, processed properly, and is of the highest quality.

- Assists in cardiac stress tests procedures when performed in conjunction with nuclear medicine procedures.
- Performs data collection, processing and analysis
- Archives data to and from storage media.
- Performs non imaging in vivo and/or radioassay studies
- Operates laboratory equipment.
- Prepares dosages and standards
- Collects the appropriate specimen for procedures using standard precautions.
- Collects validates and documents the data.
- Manages biohazardous, chemical and radioactive waste in accordance with applicable regulations and specific facility policies.

Radiopharmaceuticals

- Properly prepares and administers diagnostic radiopharmaceuticals Under the direction of institutional guidelines.

Radionuclide Therapy

- Properly prepares and administers therapeutic radionuclides and Radiopharmaceuticals under the direction of institutional regulations.

Radiation Safety

- Maintains compliance with all applicable regulations
- Performs appropriate radioactive contamination monitoring and any necessary decontamination procedures.
- Disposes of radioactive waste in accordance with institutional regulations
- Participates in programs designed to instruct other personnel about radiation hazards and principles of radiation safety.

TENDER FOR THE SUPPLY AND DELIVERY OF VEHICLE/MECHANICAL EQUIPMENT TO THE REGIONAL CORPORATION, MINISTRY OF LOCAL GOVERNMENT

TENDERS are invited for the supply and delivery of the following Vehicle/Mechanical Equipment to the Couva/Tabaquite/Talparo Regional Corporation, Ministry of Local Government:

Vehicle

Item I—One (1) Four-Wheel Drive Utility Vehicle

Mechanical Equipment

Item II—Two (2) Dump Trucks

Separate contracts may be awarded for each item or combination of items.

Tender documents may be obtained during normal working hours at the Central Tenders Board's Office, 116, Frederick Street, Port-of-Spain.

Any further technical information may be obtained from Mr. Robert Ramnarine, Workshop Foreman, Couva/Tabaquite/Talparo Regional Corporation, Ministry of Local Government. Telephone Numbers 636-1717 or 636-7295 during normal working hours.

Tenders must be accompanied by the following:

- (a) valid Income Tax and Value Added Tax Clearance Certificates issued by the Board of Inland Revenue and dated not more than six (6) months prior to the closing date of the tender;
- (b) valid Certificate of Compliance issued in accordance with the National Insurance Act.

The original and two (2) copies of the tender must be placed in separately sealed envelopes addressed to the Chairman, Central Tenders Board, 116, Frederick Street, Port-of-Spain and clearly marked on the outside: "Tender for the Supply and Delivery of Vehicle/Mechanical Equipment to the Couva/Tabaquite/Talparo Regional Corporation, Ministry of Local Government". Envelopes must be deposited in the Brown Tenders Box located in the lobby of the Board's Office no later than 1.00 p.m. on Thursday 9th August, 2007.

Tenders will be opened shortly thereafter. The tenderer or his representative may be present at the opening.

Tenderers are asked to note that the dimensions of the slot in the Tenders Box are 37.5 cm x 5.5 cm and as such tenders should be packaged accordingly.

Late tenders will not be considered in any circumstances.

The Board does not bind itself to accept the lowest or any other tender.

The Central Tenders Board reserves the right to cancel the present notice in its entirety or partially, without defraying any cost incurred by any firm in submitting its tender.

Tender Notices can also be viewed at <http://www.finance.gov.tt/tenders>.

16th July, 2007.

J. JONES
Chairman,
Central Tenders Board

TENDER FOR THE SUPPLY AND DELIVERY OF SCHEDULE 10—TYRES—OF THE ANNUAL SUPPLIES AND SERVICES CONTRACTS FOR THE PERIOD 1ST JANUARY, 2008 TO 31ST DECEMBER, 2008

TENDERS are invited for the supply and delivery of Schedule 10—Tyres—as and when required for Central Government, Ministries/Departments, Local Government and Statutory Bodies under the aegis of the Central Tenders Board for the period 1st January, 2008 to 31st December, 2008.

Tender documents may be perused during normal working hours at the Central Tenders Board Office, 116, Frederick Street, Port-of-Spain. An official receipt must be attached to the tender showing that a tender deposit of one hundred dollars (\$100.00) has been paid to the Director of Contracts. This tender deposit will be received by cash or certified cheque from Monday to Friday between the hours of 8.30 a.m. to 12.00 noon and 1.00 p.m. to 2.00 p.m. The unsuccessful tenderers will be refunded their deposits after awards are made.

Any further technical information can be obtained from Mr. Rabindranath Jogie, Director of Mechanical Services, Mechanical Services Division, Ministry of Works and Transport. Telephone Numbers 622-2321/2.

Tenders must be accompanied by the following:

- (i) valid Income Tax and Value Added Tax Clearance Certificates; and
- (ii) a valid Compliance Certificate issued in accordance with the National Insurance Act.

Contracts may be awarded for any one (1) item or combination of items.

1444—Continued

TENDER FOR THE SUPPLY AND DELIVERY OF SCHEDULE 10—TYRES—OF THE ANNUAL SUPPLIES AND SERVICES CONTRACTS FOR THE PERIOD 1ST JANUARY, 2008 TO 31ST DECEMBER, 2008—CONTINUED

The tender on the approved tender form should be placed in a sealed envelope clearly marked on the outside: "Tender for Schedule 10—Tyres—Annual Supplies and Services Contracts for the period 1st January, 2008 to 31st December, 2008" and must be addressed to the Chairman, Central Tenders Board, 116, Frederick Street, Port-of-Spain. Tenders must be deposited in the Brown Tenders Box located in the lobby of the Board's Office not later than 1.00 p.m. on Thursday 16th August, 2007.

Tenderers should note that the dimensions of the slot in the Tenders Box are 37.5 cm x 5.5 cm. Tenders should therefore be packaged accordingly.

Tenders will be opened publicly at the Board's Office shortly thereafter. The tenderer or his representative may be present at the opening.

It should be noted that prices would be made available to tenderers at a later date.

The Board reserves the right to cancel the present notice in its entirety or even partially, without defraying any cost incurred by any tenderer in submitting their tender.

Late tenders will not be considered in any circumstances.

The Board does not bind itself to accept the lowest or any other tender.

Prospective tenderers are advised that they can visit the following website address for all published Tender Notices: <http://www.finance.gov.tt/tenders>.
