POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORPORATION LIMITED

TRAFFIC MANAGEMENT PLAN FOR THE PORT AND INDUSTRIAL ESTATE OF POINT LISAS

The Traffic Management Plan has been developed to ensure safety of all visitors, customers, employees and others on the Port and Industrial Estate of Point Lisas. It aims to prevent accidents, injury to persons and damage to equipment, property and vehicles. This will be accomplished via specific guidelines for vehicular, heavy equipment and pedestrian traffic to ensure safe and efficient movement.

The Traffic Management Plan takes effect from **Friday 7th October 2011.**

2162—Continued

**GENERAL GUIDELINES****HAULIER'S TRUCK/ TRAILER INSPECTION**

1. HSE Officer on duty or senior officer of the Corporation may require inspection to be done based on:
 - a. Random selection
 - b. Where obvious defects or non-compliance are seen
 - c. Referral by security officers or senior Corporation personnel
2. Standard Inspection Zones are demarcated as outlined below:
 - a. West of the entrance gate
 - b. South of the exit gate
 - c. Lay-by Area prior to entering the Port
 - d. Other areas within the Port may be utilised from time to time depending on operational convenience
3. HSE Officer may also incorporate the use of the maintenance personnel to assist in conducting the inspections.
4. HSE Officer may determine the extent of the inspection that is required.

5. The defects outlined on the checklists fall under two categories: (i) major and (ii) minor non-conformances. Where any major non-conformance is identified, the truck will not be permitted to be processed or where the transaction has been started, the transaction will be cancelled.

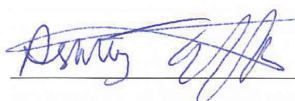

Truck will be required to leave and not allowed to re-enter until it has been determined that defects have been corrected.

Major non-conformances can be any one of the following:

- Non-compliant or missing documents – valid license and insurance documents for truck
- Non-functional locking pins
 - In the event that a driver is aware of a non-functional locking pin for receiving cargo, he will be required to notify PLIPDECO HSE (636-2201 ext 2286) or Planning Department (636-2201 ext 2258/9) who may choose to offload cargo; however no cargo would be loaded onto the defective trailer until the defects are corrected. No additional transactions would be allowed with the defective trailer until the defects are corrected.
- Tyres not in good condition (canvas/wire showing, visible thread, visible under-inflation) – Cargo would be removed from trailer but no loading would occur until defective tyre/s is repaired.
- Any sign of excessive fluid leaks (truck: refers to constant flow of fluid)
- Load is not secure/obscures view of driver/does not comply with size and width guidelines
- Obvious signs of a structurally defective trailer (crack on main beam, trailer twisted, landing gear damaged)
- No headlights (applies for night operations) – to be checked prior to entry only.

2162—Continued

- Other non-conformances or defects will be sent to the company directly and repairs would be expected to be completed within two (2) weeks. This timeframe may be extended based on the discretion of the HSE Manager who can be contacted at 636-2201 Ext. 3119/2243 or via email (gtraboulay@plipdeco.com). Once defects have been corrected, your company is required to contact the HSE Department at 636-2201 Ext. 2286/2275 or the Planning Office at 636-2201 Ext. 2258/9 to schedule a re-inspection.
- In the event that a truck is stopped at the In-gate for a random inspection, the truck would be sent back into the position in the line as before provided no defects/non-conformance was identified.
- Routine inspections would be conducted at times to minimize the effect or dislocation of hauliers; however inspections can be conducted at any time where obvious defects are observed.
- Where a major non-conformance has been identified on a truck or trailer that has a container to be offloaded, a decision may be taken by a Senior Officer of the PLIPDECO to offload the cargo on the port to prevent a haulier from returning to public roads in an unsafe condition. The haulier would not be loaded with any new cargo and would not be allowed re-entry to the port unless the non-conformance has been corrected.

**President - Point Lisas Industrial Port Development Corporation (PLIPDECO)****Date: September 28th, 2011**September 28th, 2011

2162—Continued

**HAULIER'S TRUCK/TRAILER INSPECTION CHECKLIST**

To ensure the safety of the port and its users, all trucks and trailers are subject to inspection on the port compound, (including the lay-by) prior to, and after loading. Any vehicle which is not in compliance, may have its transaction cancelled and be escorted off the compound. These inspections will be randomly conducted by the HSE Department.

Truck Registration Number:		Date:	
Trailer Registration Number:		Company Name:
