In accordance with Sections 7, 8 and 9 of the Freedom of Information Act, 1999 (FOIA) the Meteorological Services Division is required by law to publish the following statements, which list the documents and information generally available to the public.

The Act gives members of the public:

#### **Section 7 (1) (a) (i)**

#### **Function and structure of the Meteorological Services Division**

#### **Mission Statement:**

The *Meteorological Services Division's* mission is to **provide meteorological information and advice consistent with international standards towards the pursuit of national, scientific, social, economic and cultural goals and sustainable development.**

The Meteorological Services Division is a *Division of the Ministry of Public Utilities*. It comprises a staff of *Fifty-Eight (58) officers* and is headed by a *Director*. The Meteorological Services Division is divided into *three (3) responsibility* centers:

MINISTRY OF PUBLIC UTILITIES—CONTINUED

**Details of Responsibility Centres**

**(1) Administration Centre:**

*The Administration Centre is responsible for the overall policy direction of the Division. All clerical, financial and administrative functions fall under this center, which is under the purview of the Director.*

**(2) Applied Section:**

*This Section is headed by the Climatologist and has as its responsibilities the dissemination of monthly climatological information to relevant agencies both nationally and internationally. Requests for climatological information from agencies, and companies both nationally and internationally must be referred to the Climatologist for a reply. The Climatologist is also responsible for the functioning of the Rawinsonde office.*

*Both the Administration and Applied Section are housed in the same compound, which is located next to the Air Guard Compound, 357-365 Golden Grove Road, South Piarco.*

**(3) Synoptic Office:**

- f) The issuance of Common Alerting Protocol (CAP) messages to the public through the media houses and to critical agencies directly, warning of rough seas, severe weather and approaching tropical cyclones; and*
- g) Outreach to the public through lectures and seminars.*

**Effect of functions on members of the public**

The functions of the Meteorological Services Division have a profound effect on the public through the public weather forecasts and CAP messages which are issued for rough seas, severe weather and tropical cyclones. The latter warns the public about the impact of adverse weather systems on their lives and it gives the public the opportunity to take preventative measures to avoid personal or property damage. The public forecast, which is issued daily, allows the public to plan their daily schedules around expected weather events.

Companies and agencies make use of climatological data in the design of buildings, drainage, infrastructural development and environmental impact assessments.

The public has no direct involvement in policy formation. Note that the Meteorological Services Division is part of the Public Service and is therefore subject to any Government shift in policy, which itself may result from public lobby.
